Table with multiple columns listing residential properties, including address, location, and contact information. The table is organized into several columns, with the first column containing the majority of the listings. The second column contains phone numbers, and the third column contains additional contact details or addresses. The listings are sorted alphabetically by address.

Table with multiple columns listing residential properties, including addresses, descriptions, and prices. The table is organized into three main columns, with the first column containing the majority of the listings. Each entry typically includes a name or address, a brief description, and a numerical value representing the price.

Residential Listings

A-Z listings of local residential numbers.

Information listed within the A-Z section **has been provided by each Communication Provider** (phone line provider) for that individual and is published based on their directory status. If the person has been flagged as **Ex-Directory** it **will not be printed**. BT will only print information that **has been provided**. If you believe there is an omission or an error, please contact your Communication Provider to check the directory status of the information.

Data is updated annually. Changes made with your service provider will not take effect until the next A-Z Directory is created. Use of the term 'The Phone Book' also pertains to BT.
