

BT Converse 2200 User Guide

Corded Phone

Welcome

to your BT Converse 2200 Corded Telephone

- Eleven one-touch buttons for easy dialling of your most important numbers.
- Headset facility lets you make and receive calls privately while keeping your hands free.
- Handsfree button lets you make and receive calls over the built-in loudspeaker and microphone.
- Secrecy feature lets you talk to someone else close by without your caller hearing.
- Last number redial.
- Providing you are connected to a compatible switchboard, the message waiting indicator will flash when you receive new messages.*
- Amplifier lets you switch the handset earpiece volume to High.
- Adjustable ringer volume.

This User Guide provides you with all the information you need to get the most from your BT Converse 2200.

You must first set up your BT Converse 2200 before you can use it. This doesn't take long as it is easy to do.

Just follow the simple instructions on the next few pages.

Hearing aid friendly

The BT Converse 2200 is fitted with an inductive coupler so it is compatible with hearing aids. Please visit **btplc.com/inclusion/** for further practical advice on using hearings aids.

* Calls to our helpdesk made from the UK mainland and mobile networks are free. International call costs vary.

Got everything?

Getting started

Location

You need to place your BT Converse 2200 within 3 metres of a telephone socket so that the cable will reach. Your BT Converse 2200 can be wall mounted, see 'Wall mounting your phone' on page 17.

Setting up

1. Plug the end of the telephone line cord into the telephone wall socket.

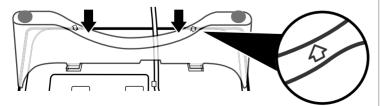

2. Check that the Dialling **Mode** switch on the underside of the base is set to **TB** for tone dialling with timed break recall.

Desk mounting plinth

If you want to remove the desk mounting plinth, push it in the same direction as the two arrows shown on the plinth. To refit the desk mounting plinth, insert the two lugs on the plinth into the base and push it down into place, as shown by the blue arrows.

Your BT Converse 2200 is now ready for use.

WARNING

Do not place your BT Converse 2200 in the bathroom or other humid areas.

Other electrical equipment close to your Converse could have an adverse effect on call quality. If you experience buzzing during a call try moving the Converse away from any electrical equipment that may be nearby.

Important

Only use the handset and line cord supplied or this product may not work.

Using broadband on the same phone line?

To avoid problems with your broadband or noise on your phone line, you might need to plug it into the wall socket via a microfilter (not supplied).

If your main phone socket has a single socket, as shown, you'll need to use microfilters.

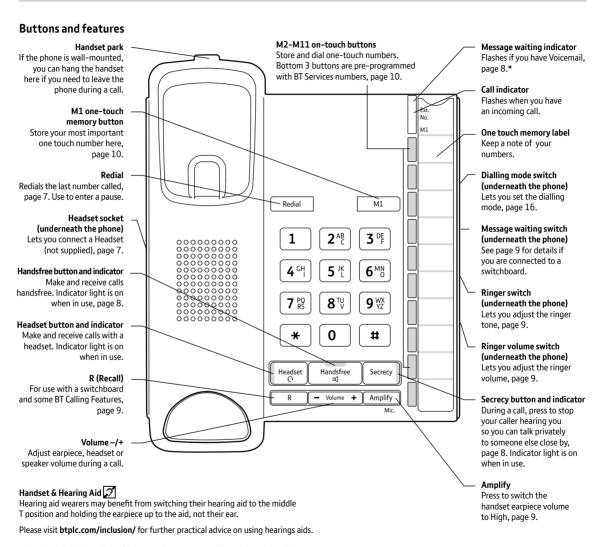

You don't need to use microfilters if your main phone socket has two separate sockets, like these:

Dialling mode

If connecting to a switchboard you may need to adjust the dialling mode setting to **P** or **T** using the **Mode** switch on the underside of the base. If in doubt, please consult your service provider.

^{*} The light will only flash if your BT Converse is connected to a PBX switch or similar. The light will not flash when used with network services such as BT 1571.

Using the phone

Making and ending calls

- 1. Lift the handset and dial the number you want.
- 2. Replace the handset to end the call.

Hearing Aid compatibility

As this telephone is fitted with an Inductive Coupler, hearing aid wearers may benefit from switching their hearing aid to the middle 'T' position and holding the earpiece up to the aid, not their ear. Please visit **btplc.com/inclusion/** for further practical advice on using hearings aids.

Make a call using a headset

Headsets are not supplied with your BT Converse 2200. However, you can purchase headsets (with RJ11 jack) by visiting shop.bt.com

- 1. Plug the headset (not supplied) into the socket marked **O** J on the underside of the base.
- 2. Press Headset and dial the number. When the headset is in use the headset indicator (on the Headset button) will be lit.

Press Headset to end the call.

Receive a call using a headset

1. When the phone rings and the headset is plugged in, press to answer.

Redialling the last number

The redial number can up to 32 digits long. If the last number dialled was longer than 32 digits, only the first 32 digits will be dialled.

1. Lift the handset, or press Headset, then press Redial

Secrecy

During a call, you can talk to someone nearby without your caller hearing you.

- 1. Press Secrety. The red Secrecy light (on the Secrety button) comes on and your caller cannot hear you.
- 2. Press Secrecy again to return to your caller.

Handsfree

Make and receive calls without lifting the handset.

Making a handsfree call

- 1. Press Handsfree . You will hear the dial tone.
- 2. Dial the number you want. When your call is answered, speak as normal (or if you wish to speak to your caller privately, pick up the handset).
- 3. Press Handsfree to end the call.

Receiving a call handsfree

1. When the phone rings, press Handsfree and speak. Press Handsfree to end the call.

Message waiting

If your BT Converse phone is connected to a switchboard, the message waiting indicator will flash when you receive new voicemail messages.

The light will not flash when used with BT 1571 or similar network voicemail services. New voicemail messages will be indicated by a stuttered dial tone when you pick up the handset.

Message waiting switch

If your telephone is connected to a switchboard you may need to change the message waiting switch setting on the base of the phone. It is pre-set to MW3 which is for an SX2000 switch. MW1 and MW2 positions are for when the telephone is connected to an ISDX switch. If the switch is moved to MW2 and the message waiting indicator stays on permanently, use MW1.

1. Lift the handset, or press header and dial 1 5 kg 7 kg 1 to connect to your answering service.

If in doubt, please refer to your PBX instructions/manager for the correct procedure to access this service.

Adjusting the ringer volume

1. Set the Ringer Volume switch on the underside of the phone to 0 (Off), 1 or 2.

Adjusting the ringer tone

1. Set the Ringer switch on the underside of the phone to 1 (Low), 2 (Medium) or 3 (High).

R (Recall)

The button is used to access a range of switchboard services, for example, to transfer calls and with some BT Calling Features.

Amplify

1. Press Amplify to switch the handset earpiece volume to High.

After you hang up, the volume will automatically return to Normal volume.

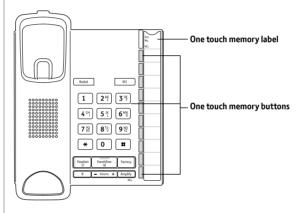

Each number can be up to 32 digits long and can include a pause, * or #.

If you enter more than 32 digits you will hear an error tone and the number entered will not be saved.

You can store your 11 most frequently used phone numbers on the one-touch memory buttons that are located on the right hand side of the product and dial them by pressing a single button.

Buttons 9-11 have been pre-programmed with the following BT Services, however you can overwrite them with your own numbers.

M9 = BT Answer 1571, M10 = Call Divert On, M11 = Call Divert Off.

To enter a pause, press Redial in the appropriate place when storing the number.

To cancel while storing, hang up the handset or press Any number already stored will be kept.

Store/replace a one touch number

- 1. Lift the handset or press Handsfree or Headset
- 2. Press and hold the one touch button that you want to store a number under. Release the button when you hear the dial tone stop.
- 3. Enter the telephone number you want to store, then press the same one touch button to save the number.
- Slide the memory label out so you can write who's number you have stored under each button.

Dial a one-touch memory number

1. Lift the handset, or press the one-touch button you want. The stored number is dialled.

Storing a pause in a number

A pause is normally inserted in a stored telephone number after a switchboard access code (e.g. 9) to allow the switchboard time to get an outside line before the number is dialled. For example, **9 – Pause – 08702405522**.

1. To enter a pause, press Redial in the appropriate place when storing the number.

Please note

You can overwrite any pre-set numbers with your own numbers by following the instructions on page 10.

Compatibility and availability of services

A switchboard can provide a similar range of functions to BT Calling Features.

If your BT Converse 2200 is connected to a switchboard, you can simply use it as a normal extension.

If you are not connected to the BT network. some of these services may not be available. Please contact your Network Provider.

Please note

Call Diversion services may allow other divert options. Check with your network provider for details.

Your BT Converse 2200 gives you easy access to a range of BT Calling Features. The bottom 3 one-touch memory buttons have been preset with the following services.

One-touch button	Service	Number
9	BT Answer	1571
10	Call Divert On	*21*
11	Call Divert Off	#21#

BT Answer 1571

Calls your network's answering service, for example BT Answer 1571, to access any voicemail messages you may have. Details on using the service are provided when you subscribe.

Call Divert

You can divert all incoming calls to another number of your choice.

Switch Call Diversion on

- 1. Lift the handset, press the Call Diversion On one-touch memory button (button 10).
- 2. Enter the number you want calls diverted to then press and listen for confirmation of your instructions.
- 3. Replace the handset.

Switch Call Diversion off

- 1. Lift the handset, press the Call Diversion Off one-touch memory button (button 11).
- 2. Replace the handset.

For further information, see the BT Calling Features User Guide supplied when you subscribe to the services of your choice.

Re-instate the pre-set BT Calling Features numbers

If you overwrite the pre-set numbers stored on the one-touch buttons, you can re-instate the original numbers at any time.

- 1. Lift the handset or press Handsfree or Headset.
- 2. Press the one-touch button you want to re-set until you hear a confirmation beep and the Secrecy light flashes.
- 3. Press the one-touch button again.
- 4. Replace the handset or press Handsfree or Grade or Headset .

14 Help

Phone does not work/No dial tone

Check that the line cord is plugged in, see page 5.

You have a dial tone, but the phone will not dial out

If you are connected to a switchboard, check whether you need to dial an access code or if you need to change the dial mode, see pages 5 and 16.

Phone ringer does not ring

Is the ringer volume switch set to 0?

Move the ringer volume switch to 1 or 2, see page 9.

General information

Important safety and care instructions. Keep for future reference.

Your BT Converse 2200 from BT is manufactured to comply with European safety standards. Please read the following instructions carefully before installing and using it.

Important

This product is intended for connection to analogue public switched telephone networks and private switchboards in the UK and Republic of Ireland.

Installation and location

- · For indoor use only in UK and Ireland
- Position all parts including cables away from heat and sun (e.g. away from radiators, window sill or other electrical equipment which can get hot)
- Keep area ventilated (e.g. don't put in cupboards or back of sofas) and don't block any vents with objects or thick carpets
- Keep device and cables out of young children's reach
- Only use cables provided by BT for this specific device; contact our helpdesk if you need a replacement
- Electronic devices hate liquids; don't place devices in damp areas or near sources of water or splashes
- Product may cause scratches or marks if placed on fragile surfaces (e.g. veneered wood or delicate fabrics); place on a mat if required
- Don't use near flammable substances or in a flammable atmosphere (e.g. warehouse or garage)
- Designed for use at room temperatures between 0 and 40°C

Care and maintenance

- Treat all parts with care; no shock or vibration, and don't pull or twist any cables
- Regularly check your product for damage to ensure small parts aren't exposed
- · Dust with a soft dry cloth; don't use water or solvent
- Regularly check that objects don't cover any parts or any vents that could cause overheating
- When not in use, store in a dry place and away from extreme heat or cold

Warnings

- If any parts of your product or any cables appear damaged, discontinue use immediately and contact our helpdesk. See terms in the Guarantee section
- Don't try to open your device. There are no serviceable parts and you
 risk an electrical shock
- There is a slight chance your phone could be damaged by an electrical storm. We recommend that you unplug the phone line cord during an electrical storm

Guarantee

Your Converse 2200 is guaranteed for 1 year from when you bought it. This means we'll either repair it or replace all or part of the product if it's not working properly. If you bought the product more than 28 days ago, we might replace it with a refurbished or repaired one.

Guarantee conditions:

- The guarantee only covers problems found in the 1 year quarantee period
- · You'll need your receipt or other proof of purchase
- Your product is returned to BT or one of our partners as instructed
- This guarantee doesn't cover any problems caused by accidents, misuse, fair wear and tear, neglect, tampering with the equipment, or any attempt at adjustment or repair other than through approved agents
- This guarantee doesn't affect your statutory rights

Within the 1 year quarantee period

Before returning your product, please contact the Helpline on 0800 145 6789*. Additional answers to frequently asked questions are available from bt.com/producthelp. If the helpdesk can't fix the problem, they'll let you know how to get a repair or a replacement. If you need to return your product please pack it in the original box if you still have it and make sure you include all the parts like cables. You'll need a fault reference number from the helpdesk. This does not affect your statutory rights.

Outside of the 1 year guarantee period

If your product needs repair after the guarantee period has ended, the repair must meet the approval requirements for connection to the phone network. We recommend that you contact BT's recommended repair agent Discount Communications on 0800 980 8999 or a local qualified repairer.

Technical information

How many telephones can you have?

- All items of telephone equipment have a Ringer Equivalence Number (REN), which is used to calculate the number of items which may be connected to any one telephone line. Your BT Converse 2200 has a REN of 1. A total REN of 4 is allowed. If the total REN of 4 is exceeded, the telephone may not ring.
- With different telephone types there is no guarantee of ringing, even when the REN is less than 4.

Switchboard compatibility

This product is intended for use within the UK for connection to public telephone network and compatible switchboards, which support tone dialling and timed break recall.

Your BT Converse 2200 can be set to work with your switchboard by moving the switch on the underside of the base to either P (pulse) T (tone) or TB (timed break). If in doubt, please consult your service provider.

Switch from pulse to tone during a call

If you need to set your BT Converse 2200 to pulse dialling, you can temporarily switch to tone dialling during a call – for example, if asked to enter a code number. To switch to tone dialling during a call, press

Disposing of your old electrical and electronic equipment

The Government has a legal requirement to minimise the unsorted waste disposal of electrical and electronic equipment and to maximise its separate collection and environmentally sound management. The symbol shown here and on a product, means you shouldn't throw it in your normal rubbish at the end of its working life.

This product may contain substances that could be harmful to people or the environment if it's not recycled correctly. Check with your retailer to find out how to recycle your old equipment, or if you've bought something from us that has the crossed out wheelie bin symbol on it and it's similar to the kit you don't need any more, you can send us your old kit and we'll get rid of it in an environmentally friendly way.

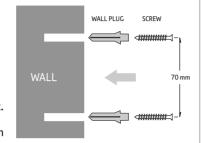

Here's the address: WEEE Take Back Scheme, BT Returns, BT DF, Darlington Road, Northallerton, DL6 7ZY.

Website address: bt.com/weee

We're not responsible for the costs of returning items. If you don't wish to return kit to us, lots of electronics shops have their own 'take back' schemes where you can recycle very small electrical and electronic goods. If you're a household user, you can also take it to your local recycling centre – go to recyclenow.com to find the one nearest to you. Please dispose of this carefully and help to protect our planet.

Wall mounting your phone

- Unclip the stand from the base of the phone and remove it. Re-route the telephone line cord towards the bottom of the phone.
- 2. Drill two holes in the wall 70mm vertically apart using an 5mm drill bit.
- Insert the wall plugs if necessary, then insert the screws leaving about 5mm protruding from the wall on which to hang the phone.

4. Slot the holes on the back of the base over the screw heads and gently pull the phone down to fix it securely in place.

Using the handset park when the phone is wall-mounted

If you need to leave the phone whilst on a call, hang the handset on the handset park at the top of the base.

WARNING

Before you wall-mount your BT Converse 2200, check that you are not drilling into any hidden wiring or pipes.

Make sure the telephone line cord will reach the wall socket.

Available in other formats including braille, large print or audio CD. If you would like a copy, please call 0800 145 6789*.
